INTERESTS AND HOBBIES

Interests: I am a software developer with 2 years of experience. I am actively working to improve my developer skills, study different courses, articles and create small projects while studying to consolidate knowledge and skills. I am capable, quickly learn new things. In my free time I solve different tasks using Python. I am a good team player who can work in a team and independently, I always take the initiative. I consider myself a person who knows how to work under stressful conditions.

Hobbies: I am building and programming RC models with Arduino. I like to read something new about computers and also enjoy to build them. I've been swimming since 2014. I love to visit places of natural and scenic beauty around the world.
